Design direction, upgraded

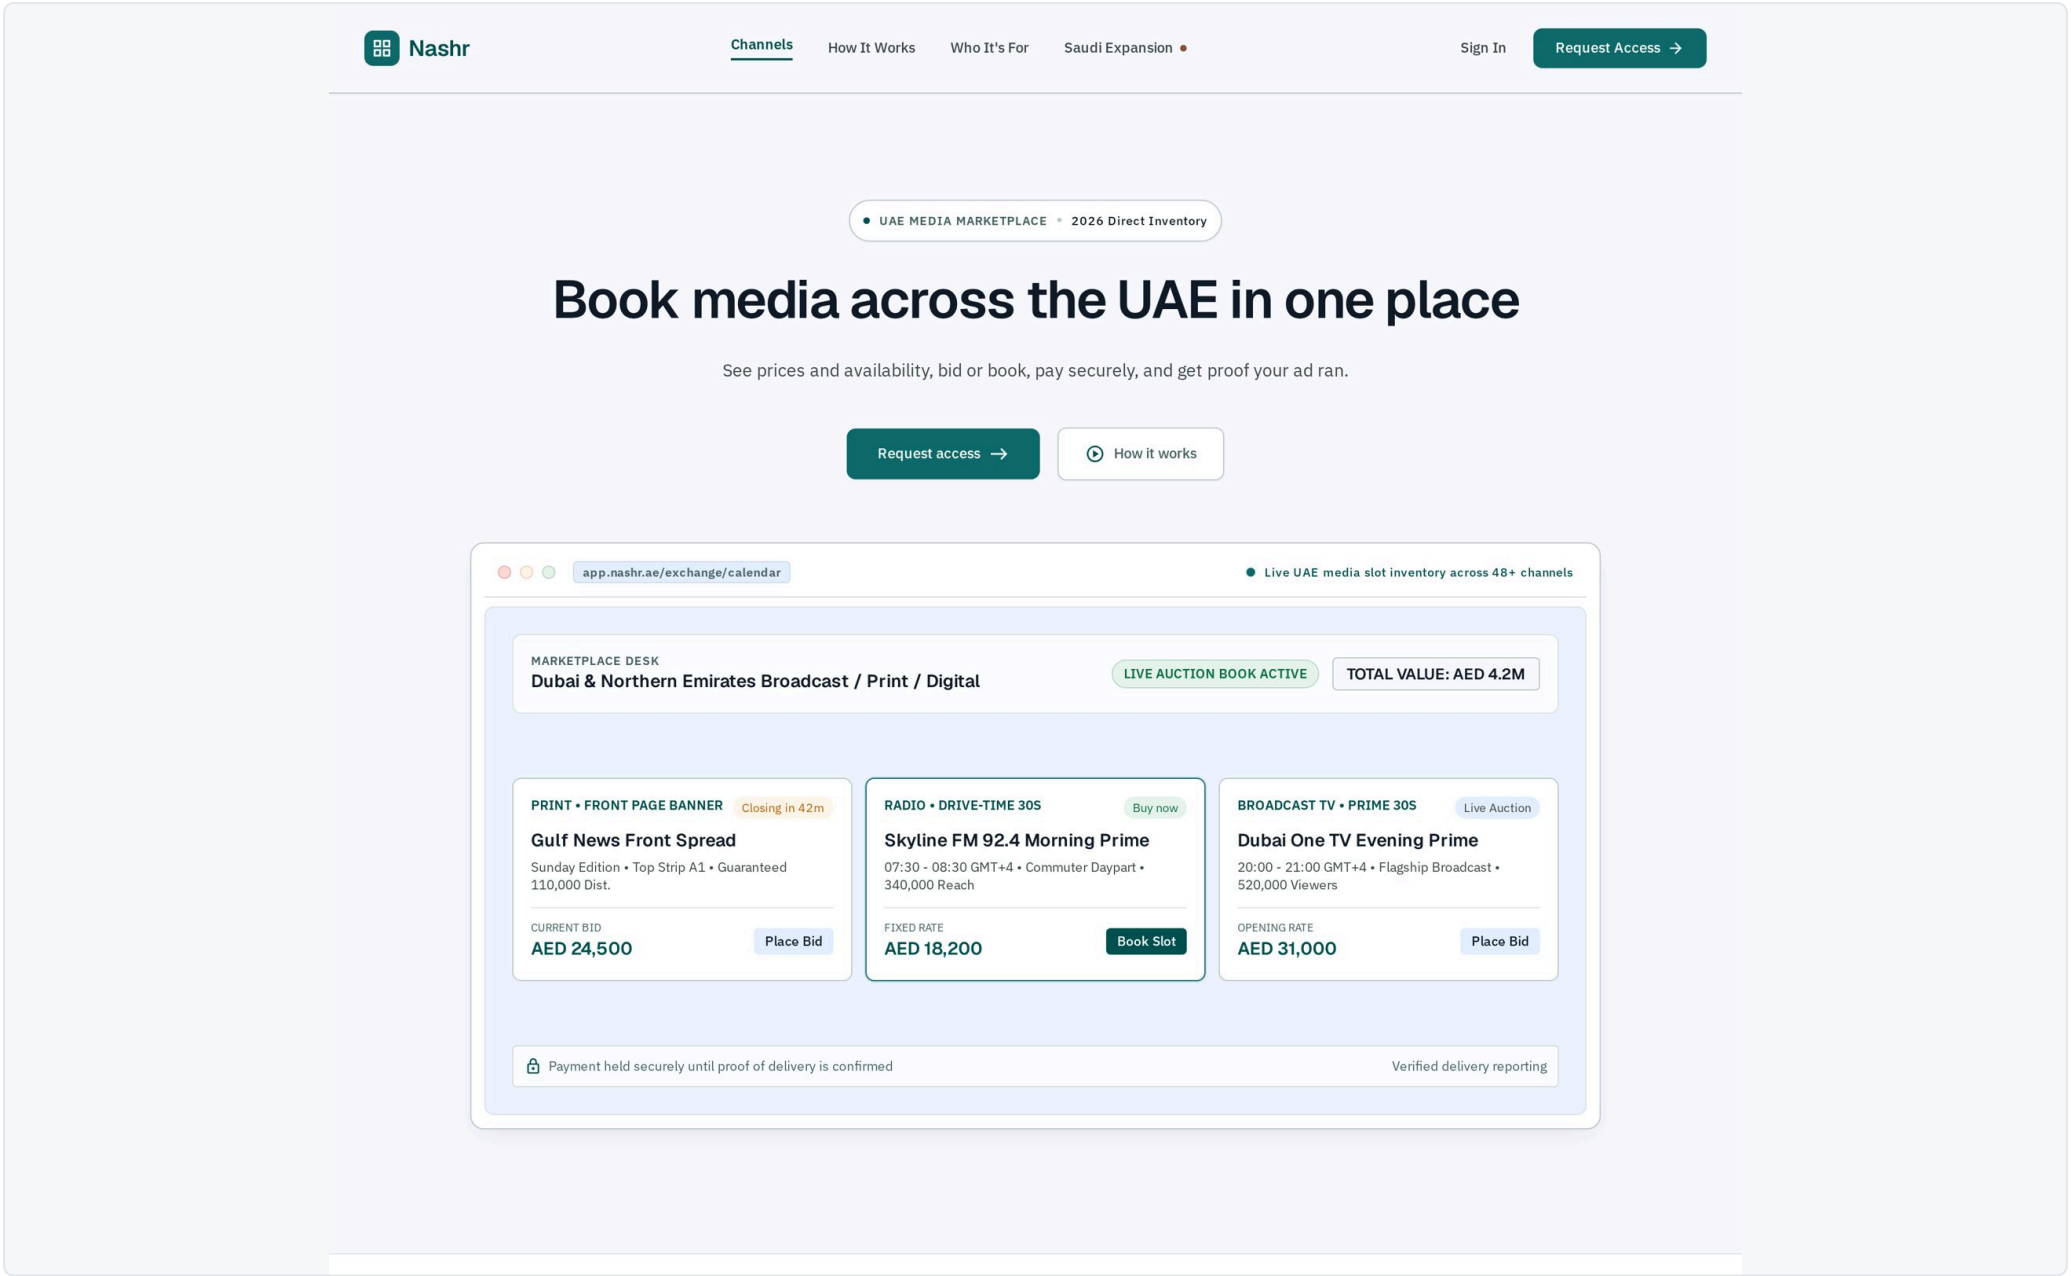

13 key screens, upgraded to a calmer, more premium finish: more space, larger figures, quiet dot-and-label statuses, one main action per screen, and the same app shell across buyer, seller and admin. Calendar at the centre, clean and calm, Airbnb-like clarity, built on the rules in the brief and your direction response.

These are drafts for direction, not final designs: colours and fonts are placeholders until the Nashr brand files arrive, sample data is illustrative, and the approved direction will be refined in Figma section by section for your sign-off.
