First screens: draft for review

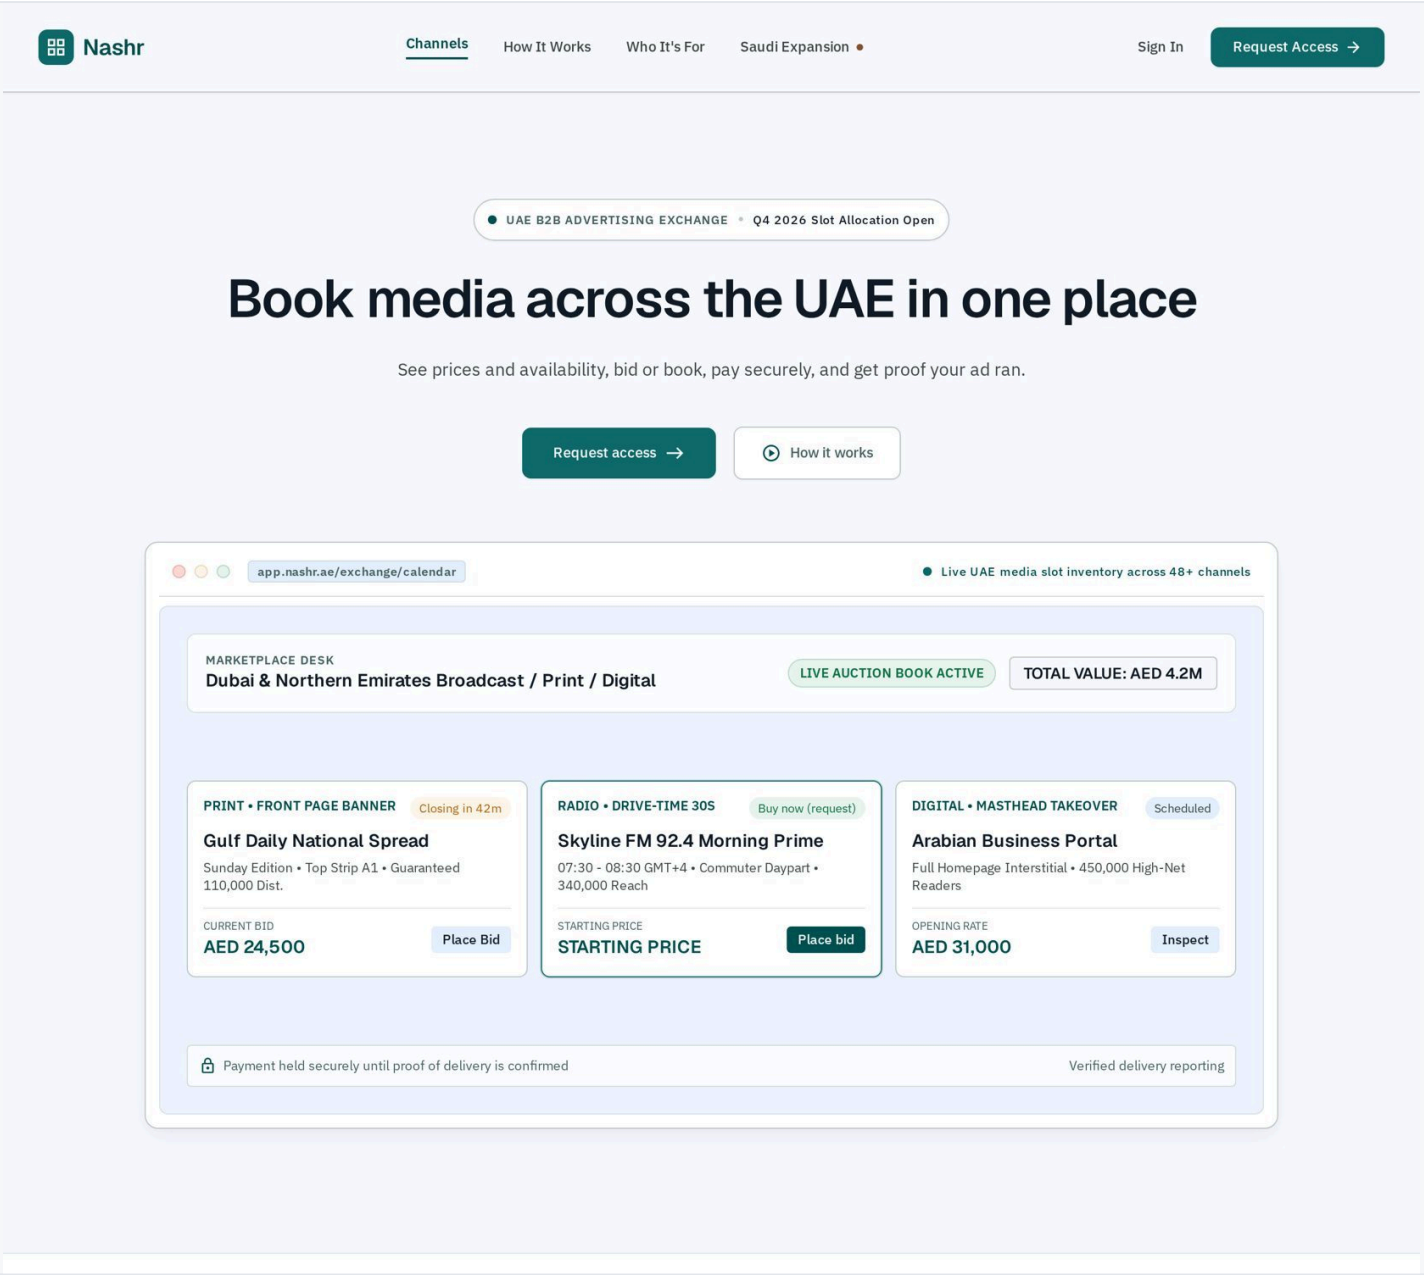

13 key screens generated in Google Stitch to show the look and the main flows. Calendar at the centre, clean and calm, Airbnb-like clarity, built on the rules in the brief and your direction response.

These are drafts for direction, not final designs: colours and fonts are placeholders until the Nashr brand files arrive, sample data is illustrative, and the approved direction will be refined in Figma section by section for your sign-off.
